Section 2: EX-99.1 (EX-99.1)
Forward-Looking Statements

This presentation may include forward-looking statements, both with respect to Argo Group and its industry, that reflect our current views with respect to future events and financial performance. These statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include all statements that do not relate solely to historical or current facts, and can be identified by the use of words such as “expect,” “intend,” “plan,” “believe,” “do not believe,” “aim,” “project,” “anticipate,” “seek,” “will,” “likely,” “assume,” “estimate,” “may,” “continue,” “guidance,” “objective,” “outlook,” “trends,” “future,” “could,” “would,” “should,” “target,” “on track,” and similar expressions of a future or forward-looking nature. All forward-looking statements address matters that involve risks and uncertainties, many of which are beyond Argo Group’s control. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements and, therefore, you should not place undue reliance on any such statements. We believe that these factors include, but are not limited to, the following:

1) Unpredictability and severity of catastrophic events;
2) Rating agency actions;
3) Adequacy of our risk management and loss limitation methods;
4) Cyclical demand and pricing in the insurance and reinsurance markets;
5) Statutory or regulatory developments including tax policy, reinsurance and other regulatory matters;
6) Our ability to implement our business strategy;
7) Adequacy of our loss reserves;
8) Continued availability of capital and finance;
9) Retention of key personnel;
10) Competition;
11) Potential loss of business from one or more major insurance or reinsurance brokers;
12) Our ability to implement, successfully and on a timely basis, complex infrastructure, distribution capabilities, systems, procedures, and internal controls, and to develop accurate actuarial data to support the business and regulatory and reporting requirements;
13) General economic and market conditions (including inflation, volatility in the credit and capital markets, interest rates, and foreign currency exchange rates);
14) The integration of businesses we may acquire or new business ventures we may start;
15) The effect on our investment portfolio of changing financial market conditions including inflation, interest rates, liquidity and other factors;
16) Acts of terrorism or outbreak of war; and
17) Availability of reinsurance and retrocessional coverage, as well as management’s response to any of the aforesaid factors.

In addition, any estimates relating to loss events involve the exercise of considerable judgment and reflect a combination of ground-up evaluations, information available to date from brokers and agents, market intelligence, initial tentative loss reports, and other sources. The actuarial range of reserves and management’s best estimate is based on our then-current state of knowledge including explicit and implicit assumptions relating to the pattern of claim development, the expected ultimate settlement amount, inflation and dependencies between lines of business. Our internal capital model is used to consider the distribution for reserving risk around this best estimate and predict the potential range of outcomes. However, due to the complexity of factors contributing to the losses and preliminary nature of the information used to prepare these estimates, there can be no assurance that Argo Group’s ultimate losses will remain within the stated amount.

The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein and elsewhere, including the risk factors included in our most recent reports on Form 10-K and Form 10-Q and other documents of Argo Group on file with or furnished to the U.S. Securities and Exchange Commission ("SEC"). Any forward-looking statements made in this presentation are qualified by these cautionary statements, and there can be no assurance that the actual results or developments anticipated by Argo Group will be realized, or even if substantially realized, that they will have the expected consequences to, or effects on, Argo Group or its business or operations. Except as required by law, Argo Group undertakes no obligation to update publicly or revise forward-looking statements, whether as a result of new information, future developments or otherwise.

Argo has maintained a track record of making thoughtful decisions to improve performance within existing product lines; Below are examples of prior portfolio rationalization that is now evident in financial results:

- **E&S Transportation**  
  Exited stand-alone commercial auto before significant market dislocation

- **E&S Allied Medical**  
  Pursued aggressive rate change in key regions to improve loss ratio

- **E&S Contract**  
  Reduced exposure to CAT exposed property business in LA and FL

- **Programs**  
  Reduced exposure to non-strategic and underperforming programs such as janitorial and wheels programs

- **Argo Pro**  
  Exited insurance agent and real estate E&O lines

- **Argo Insurance**  
  - Non-renewed restaurant lines in central and eastern U.S.
  - Sold small policy grocery, restaurants and convenience stores book in 2015

Well Positioned for Value Creation in 2017 and Beyond

We believe that Argo Group continues to have the potential to generate substantial value for new and existing investors

Operations

- Results of underwriting initiatives evident in financial results
- Best in class loss ratios, improved to 57.4% in 2016 from 64.5% in 2012
- Incremental underwriting margin and yield improvements as well as a well balanced investment portfolio should favorably impact ROE going forward
- Continue to employ and attract some of the best talent both in the insurance and technology industries
- Integration of Ariel Re on track and expected to yield benefits across Argo’s platform

Capital

- Moderate financial leverage
- Strong balance sheet with 15 years of overall redundant loss reserves
- Strong track record of disciplined capital management and opportunistic M&A strategy

Valuation

- Compelling investment case, trading at a price/book of 1.0x versus peers at 1.3x
- Stock trading at a discount to peers notwithstanding similar returns
  - Argo’s four year average ROE is 9.7% versus peer average of 9.2%1
