

**Reconciliations of the non-GAAP financial measures presented in the remarks by Howard Willard, Altria Group, Inc.’s (Altria) Chairman and Chief Executive Officer, during Altria’s 2018 Second Quarter Earnings Call.**

**Non-GAAP Financial Measures**

Altria’s management reviews certain financial results, including revenues net of excises taxes per 1000 units, which Altria uses as the measurement of net price realization, for planning, forecasting and evaluating business and financial performance. Revenues net of excise taxes are calculated as net revenues less excise taxes billed to customers. Altria’s management believes that excluding the impact of excise taxes billed to customers from the measurement provides useful insight into the impact of the segment’s pricing actions year-over-year.

Net price realization is not consistent with U.S. generally accepted accounting principles (GAAP) and may not be calculated the same as similarly titled measures used by other companies. Net price realization should thus be considered as supplemental in nature and not considered in isolation or as a substitute for the related financial information prepared in accordance with GAAP. Reconciliations of historical net price realization to corresponding GAAP measures are provided below.
