Safe Harbor Statement

This presentation contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for "forward-looking statements" provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. You can find many of these statements by looking for words such as "anticipates," "expects," "believes," "estimates" and "intends" and words or phrases of similar meaning. We make forward-looking statements regarding projected sources of funds, availability of acquisition and growth opportunities, adequacy of our allowance for loan and lease losses and provision for loan and lease losses, our commercial real estate portfolio and subsequent charge-offs. Forward-looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond the control of Umpqua. Risks and uncertainties include those set forth in our filings with the SEC and the following factors that might cause actual results to differ materially from those presented:

- The ability to attract new deposits and loans and leases
- Demand for financial services in our market areas
- Competitive market pricing factors
- Deterioration in economic conditions that could result in increased loan and lease losses
- Risks associated with concentrations in real estate related loans
- Market interest rate volatility
- Stability of funding sources and continued availability of borrowings
- Changes in legal or regulatory requirements or the results of regulatory examinations that could restrict growth
- The ability to recruit and retain key management and staff
- Availability of, and competition for, FDIC-assisted acquisition opportunities
- Risks associated with merger integration
- Significant decline in the market value of the Company that could result in an impairment of goodwill
- The ability to raise capital or incur debt on reasonable terms
- Effectiveness of the Emergency Economic Stabilization Act of 2008 (the "EESA") and other legislative and regulatory efforts to help stabilize the U.S. financial markets
- Future legislative or administrative changes to the Capital Purchase Program enacted under the EESA.

There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. For a more detailed discussion of some of the risk factors, see the section entitled "Risk Factors" in the Form 10-K for the year ended December 31, 2009, as updated and supplemented in our filings on Form 10-Q and Form 8-K. We do not intend to update any factors or to publicly announce revisions to any of our forward-looking statements. You should consider any forward looking statements in light of this explanation, and we caution you about relying on forward-looking statements.
